THE REQUIREMENT

For lighting requirements of new equipment, maintenance or repair of the naval fleet, users of the sector search for suppliers with lighting expertise.

ISSUE.

■ To design, develop and manufacture existing incandescent lamps. But also to bring solutions to obsolescence or/and support the user on LED evolution requirements in energy transition programs.

THE SOLUTION

With its Research & Development Department, its production Unit and laboratory located in France, MINILAMPE is an historical OEM, recognized for the supply of incandescent lamps approved from NATO. These lamps meet maintenance requirements for on-board equipment and are conform to the original technical specifications.

Moreover, MINILAMPE manufactures, designs and/or re industrializes obsolete lamps and supports its customers by bringing custom-made LED solutions within the context of technological lighting systems 'changes.

THE RESULT

- MINILAMPE brings its lighting expertise to meet customers' requirements in Marine sector.
- MINILAMPE brings solutions to obsolescence to maintain the operations of the existing fleet.
- MINILAMPE brings custom made LED solutions to replace the existing lighting. Benefits are energy savings and reduction in maintenance costs.
- MINILAMPE offers its customers fast and effective solutions with its buffer stock management on the main lamps as well as worldwide deliveries, which enables operators to maintain their fleet in operational condition, to avoid stock shortage and to reduce maintenance costs.
- As OEM, MINILAMPE guarantees lamp traceability and conformity to the technical specifications. Certificate of conformity supplied on request.
