THE REQUIREMENT

For their requirements in lamps used for hematology analyzers, our customer looked for a lighting specialist who could meet their technical specifications and manufacture bespoke lamps.

ISSUE.

■ To design, develop, manufacture, and supply incandescent lamps according to our customer's technical specifications and be conform to the medical standards while guaranteeing reliability and quality of the range of lamps manufactured.

THE SOLUTION

With its Research & Development Department, its production unit and its laboratory located in France, MINILAMPE is a historical manufacturer known for its lighting expertise and custom made solutions.

MINILAMPE has developed a medical lamp range which complies with our customer's demands, guaranteeing product conformity with controls and test all along the manufacturing process.

Furthermore, MINILAMPE designs, manufactures and replaces obsolete lamps, offers custom-made LED solutions in the process of technological lighting evolution.

THE RESULT

■ MINILAMPE bring its expertise and its know-how in lighting to meet our customer's requirements in the medical sector. With this range of medical lamps, our customer brings reliability on its hematology analyzers.
